RALPH GIANN C. SUQUIB

FULL-STACK DEVELOPER | SOFTWARE DEVELOPER

Bohol, Philippines • +63 926 400 1512 • giannralph@gmail.com • github.com/Ralphyy9yy

PROFESSIONAL SUMMARY

Computer Science student and full-stack developer with 2+ years of hands-on experience building web, mobile, and database-driven applications. Skilled in ReactJS, TypeScript, JavaScript, Java, SQL/MySQL, Supabase, Firebase, HTML/CSS, and Git/GitHub. Experienced in developing management systems, dashboards, authentication workflows, record-management solutions, and user-facing applications. Capable of translating business requirements into practical software solutions, troubleshooting technical issues, managing databases, and improving applications based on user feedback.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL, HTML, CSS
Frontend: ReactJS, Responsive Web Design, UI Development
Backend & Database: MySQL, Supabase, Firebase, Database Design, CRUD Operations
Development Tools: Git, GitHub
Development Concepts: REST APIs, SDLC, Debugging, Troubleshooting, Authentication, Role-Based Access Control
Application Development: Dashboards, Reporting Systems, Record Management, Workflow Automation, Administrative Systems

SOFTWARE DEVELOPMENT PROJECTS

MASSO IS - LGU Assessor's Office Management System

Full-Stack Developer | Current Development Project

- Developing a database-driven management system to streamline property-record workflows for an LGU Assessor's Office.
- Implementing property search, record management, data synchronization, duplicate and same-PIN detection, certificate generation, monitoring, and audit logging.
- Designing database structures and application workflows based on actual office processes and operational requirements.
- Developing user-access and administrative features, including backup and recovery functionality, to support secure and reliable record management.

BoardMate PH - Boarding House Listing Platform

Application Developer | Personal Project

- Developed a boarding-house listing platform for students near BISU Balilihan Campus.
- Created user-facing workflows for browsing accommodation listings and posting boarding houses.

EasyStay – Resort Booking & Accommodation Management System

Full-Stack Developer | Academic Project

- Developed a resort booking system for managing reservations and accommodation information.
- Created database-driven workflows and user-facing interfaces for storing, retrieving, and updating booking records.

AlertU – Campus Emergency Response Application

Application Developer | Academic Project

- Developed an emergency-response application designed to support campus safety and rapid incident reporting.
- Created user workflows for submitting emergency reports and communicating urgent information.

ScamGuard – Online Scam Detection & Reporting Application

Mobile Application Developer | Academic Project

- Developed a mobile application focused on helping users identify and report potentially fraudulent online content.
- Designed reporting workflows for documenting suspicious activities and scam-related information.

EDUCATION

Bachelor of Science in Computer Science | Bohol Island State University – Balilihan Campus
Magsija, Balilihan, Bohol • 2023 – Present • Expected Graduation: 2027

SEMINARS & TRAINING

- AI-Assisted Development: Power, Responsibility, and Real-World Impact — BISU Balilihan Campus (2026)
- Cybersecurity Awareness Seminar — BISU Balilihan Campus (2025)

CORE COMPETENCIES

Problem Solving • Debugging & Troubleshooting • Adaptability • Communication • Team Collaboration • Time Management • Attention to Detail • Requirements Analysis
